

MAKE-A-TON

HISTORY

With students from the top engineering institutions from all over the country racking their brains to solve unique and challenging problem statements, with mentorship and guidance from industry experts, last time, Make-a-Ton was bound to be the place for all the tech-enthusiasts and aspiring entrepreneurs, to learn, grow and collaborate; whether it's through a hardware project or software to celebrate the spirit of Build over Buy.

Make-a-Ton has been a witness to phenomenal ideas and products created by 25 teams of over 100 participants mentored by professionals from different backgrounds. Participants created products ranging from drones used in disaster relief, smart safety gloves to be used at construction sites to apps that connect you with people worldwide through alarms and won prizes and sponsored gifts worth 1.5 lacs, bagged internships at disruptive tech companies and got an opportunity to connect with tech evangelists.

MAKE-A-TON

EMPOWERING INNOVATORS

This year, Make-a-Ton, presented by CITTIC, invites University students to propose innovative solutions that fall under any of the four categories mentioned below:

Market Potential: Your idea or product has a solid business plan and is market ready to generate revenue.

Invention and Innovation: Your idea or product is a completely new innovation or drastically improves an existing product or technology. The product/idea might be ahead of it's time to start generating revenue.

Social Commitment: Your idea or product strengthens a section of the society which might not generate revenue but can move forward as an open source or community funded project.

Hack for CUSAT: Your idea or product solves a fundamental problem faced by Cusatians. This category is only open to students of CUSAT.

The Centre for Innovation, Technology Transfer and Industrial Collaboration (CITTIC), the technology business incubator of Cusat, has nurtured several young startups and has supported the growth of technology in the student community. CITTIC was set up on the campus with central and state government funding to provide a vibrant, innovative and entrepreneurial environment for faculty and students to run university-linked startup companies.

In addition to physical incubation, the CITTIC provides mentoring and networking support to help students realise their dream of converting innovative ideas into successful businesses. Training workshops, seminars and exhibitions are organised regularly to create an ecosystem for the growth of student entrepreneurs.
